

## Reading Newspapers

Reading English newspaper can improve our reading ability, learn more vocabulary and let us know what has happened in the world. We can read newspaper via the methods below:

1. Turn to the front page. Read the headlines to know what has happened because the most important things are put on the front page.
2. Choose the first five articles that attract you. Then read the first two to three of them.
3. If you want to read more, you can turn to other columns, such as sport. Then choose the top five articles, read their title and the first paragraph. We can use these methods to reduce the time we read the newspapers and keep us informed of important events.

## SCMP Young Post

YKN students can log in to read **SCMP** and **Young Post** online.
